

**FUND STRATEGY**

The ATLAS Infrastructure Global Strategy aims to provide investors with exposure to a selection of high quality infrastructure equities. The portfolio will be invested in OECD countries only and is a high conviction strategy focussed on investing in infrastructure securities which provide the optimal balance of return and risk. The fund aims to monitor and manage carbon and climate change risk exposures within set tolerances.

**COMMENTARY**

The ATLAS portfolio returned 0.39% (net of fees) in October versus the benchmark return of 0.39%. The total contribution to local returns from our equity holdings was 1.25%. The main contributors in the period were our holdings in Avangrid, Eurotunnel and Aeroports de Paris. Severn Trent and Transurban Group detracted from returns in the period.

Application price:	1.0039
Redemption price:	1.0039
Buy/sell spread:	0
Minimum investment:	50,000
Distribution frequency:	Semi-Annual
Latest distribution:	n/a
Distribution date:	n/a

#### PORTFOLIO POSITIONING & MACRO OUTLOOK

At the end of the month the ATLAS portfolio was over 50% invested. We expect that the ATLAS Investment Committee will continue to review and add positions over the coming months. Due to the high cash weighting the portfolio currently has a lower GDP, CPI and Long Bond exposure compared with our investment universe. The exposure to renewable energy and rail in our portfolio leads to a positive exposure to fast climate transition scenarios and a negative exposure to delayed action climate scenarios.

#### MONTHLY STOCK HIGHLIGHT

ATLAS added a portfolio position in EDP Renovaveis SA (EDPR) during then month. EDPR is a global renewable energy company headquartered in Spain, the majority of its business comprises of wind generation assets in the US, Portugal and Spain. EDPR has a large installed base of generation assets that are now producing stable cashflows which will support growing returns to shareholders as well as fund new build opportunities in the US in order to meet mandatory renewable targets. The ATLAS analysis supported the thesis that current wind PPA pricing in the US was consistent with EDPR target returns and that potential changes to federal renewable policy and tax incentives would not adversely impact the returns for EDPR.
