

FUND STRATEGY

The ATLAS Infrastructure Global Strategy aims to provide investors with exposure to a selection of high quality infrastructure equities. The portfolio will be invested in OECD countries only and is a high conviction strategy focussed on investing in infrastructure securities which provide the optimal balance of return and risk. The fund aims to monitor and manage carbon and climate change risk exposures within set tolerances.

COMMENTARY

The ATLAS portfolio returned -0.94% (net of fees) in December versus the benchmark return of 0.46%. The total contribution to local returns from our equity holdings was -0.44%. The main contributors in the period were our holdings in Altagas Canada, Transurban and Getlink. Norfolk Southern, Spark and Southern were the main detractors.

PORTFOLIO POSITIONING & MACRO OUTLOOK

At the end of the month the ATLAS portfolio was 93% invested. Compared with the investment universe the portfolio has a neutral exposure to GDP and a more hedged position to CPI and long bonds. The portfolio has a defensive positioning compared to the universe in the event of a stagflation scenario, a small negative impact in a recession scenario. The portfolio has a small positive exposure to fast transition compared with an overall negative exposure in the universe.

MONTHLY STOCK HIGHLIGHT

GetLink owns the concession for the channel tunnel rail link and the 'le shuttle' car and truck rail service. The channel tunnel concession is one of the longest in the infrastructure sector and runs until 2086. The majority of the asset cashflows derive from capacity payments for tunnel access from Eurostar passenger services although the profitability of the 'le shuttle' truck service has increased dramatically over the past years as demand for shorter transit times and guaranteed availability has increased the value of the shuttle service. Although there are short term risks associated with potential changes to customs arrangements between UK and France, longer term structural drivers will continue to favour high speed rail over air travel and freight and truck shuttles over trucks and ferries. As such Getlink is expected to be a beneficiary from a fast transition to a low carbon economy.
