

**FUND STRATEGY**

The ATLAS Infrastructure Global Strategy aims to provide investors with exposure to a selection of high quality infrastructure equities. The portfolio will be invested in OECD countries only and is a high conviction strategy focussed on investing in infrastructure securities which provide the optimal balance of return and risk. The fund aims to monitor and manage carbon and climate change risk exposures within set tolerances.

**COMMENTARY**

The portfolio returned -1.43% (net of fees) in July versus the benchmark return of 0.92%. The total contribution to local returns from our equity holdings was 0.57%. The main contributors in the period were our holdings in Edison International, Elia System Operator and Altagas Canada. Red electrica Getlink & Aena were the main detractors.

**PORTFOLIO POSITIONING & MACRO OUTLOOK**

At the end of the month the Global Strategy was 91% invested. During the month we exited Flughafen Wien, Altagas Canada and Fraport and added a positions in Eutelsat, Atlas Arteria and Red Electrica. The net impact has been to increase slightly our portfolio GDP exposure whilst improving our CPI beta and increasing our expected total return. The Global Strategy remains well positioned with respect to stagflation and climate transition scenario risk but has less recession valuation upside compared with the universe. GDP exposure remains in line with the universe whilst CPI and long bond risk exposures are lower.

**MONTHLY STOCK HIGHLIGHT**

Hydro One is a C\$27bn EV company, a pure electricity transmission and distribution utility operating in the province of Ontario in Canada. The company was IPO'ed in 2015 and the Ontario Province holds a 47% minority stake. Hydro One's growth in regulated asset base will not be encumbered by potentially escalating fuel costs as the company does not own any generation assets. The impact of carbon taxes on purchased power prices is mitigated as more than 93% of electricity generated in Ontario comes from non-GHG emitting resources (nuclear, hydro, wind and solar). Over 2017-2018 Hydro One had attempted to acquire Avista Corp, a \$5bn EV, U.S. utility based in Washington, for an EV/Rate Base multiple of 1.6x. The acquisition was blocked by the Washington regulator in December 2018. Disapproval of the Avista acquisition was overall a positive investment signal for ATLAS. Hydro One was prevented from making a value-dilutive transaction as the multiple to be paid for Avista was higher than Hydro One's trading levels (1.2x-1.3x) and the level of synergies to be extracted from the deal was limited.
