## WHAT IS THIS PRODUCT?

### Type:

UCITS

### Term:

This product is not subject to any fixed term.

The PRIIPs Manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

### Objectives:

The Fund seeks to achieve income and capital growth over the medium to long term.

### Intended Retail Investor:

This product is for investors, seeking growth through an actively managed Fund invested in Equities. Investors should appreciate that their capital will be at risk and that the value of their investment and any derived income may fall as well as rise.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the fund to pay you.

Further information on the risks faced by the Fund is included in "Risk Factors" in the prospectus.

### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 5 years Investment 10 000 GBP			
Survival Scenarios Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Stress scenario	What might you get back after costs	5 290 GBP	4 660 GBP
	Average return each year	-47.09 %	- 14.16 %
Unfavourable scenario	What might you get back after costs	9 490 GBP	10 100 GBP
	Average return each year	-5.05 %	0.19 %
Moderate scenario	What might you get back after costs	10 670 GBP	14 190 GBP
	Average return each year	6.67 %	7.25 %
Favourable scenario	What might you get back after costs	13 150 GBP	17 660 GBP
	Average return each year	31.52 %	12.04 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 05/2023 and 07/2024.

Moderate: This type of scenario occurred for an investment between 02/2017 and 01/2022.

Favourable: This type of scenario occurred for an investment between 05/2018 and 04/2023.

## WHAT HAPPENS IF WAYSTONE MANAGEMENT COMPANY (IE) LIMITED IS UNABLE TO PAY OUT?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- GBP 10 000 is invested.

Investment 10 000 GBP	If you exit after 1 year	If you exit after 5 years
Total costs	79 GBP	569 GBP
Annual Cost Impact*	0.79 %	0.85 %

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.10% before costs and 7.25% after costs.
